1.1 Changes to the Code Base.....	2

1 Major Changes in Version 0.94

Note:

This is not a complete list of changes, just some of the more important ones. A full list of changes in this release is available.

1.1 Changes to the Code Base

- Add support for font auto-detection (easier font configuration). Committed by JM. Thanks to Adrian Cumiskey. See Issue [41831](#).
- Add support for the collapsing-border model in tables. Committed by VH, JM. See Issue [36934](#).
- Add support for named destinations in PDF. Committed by JB.
- Added support for UAX#14 type line breaking. Support does not extend across nested fo:inline elements. Committed by MM.
